

BRONCHI

MODULE | MP0001

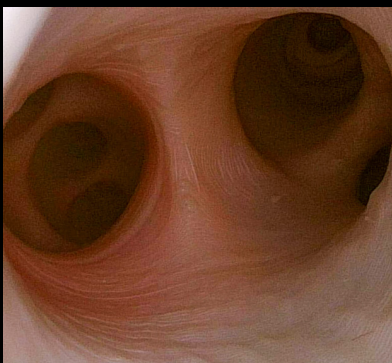

Turn the V2 into a bronchoscopy trainer.

The module includes a detailed bronchial tree made from five interchangeable sections.

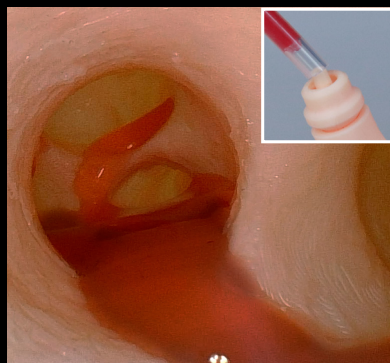

Use it to practise bronchoscope navigation, explore bronchial anatomy and train with simulated mucus, secretions and foreign bodies.

KEY FEATURES

*DETAILED BRONCHIAL ANATOMY

The bronchial tree extends to fourth-generation branches, giving learners detailed anatomy for scope navigation and orientation.

*BLEEDING FROM ANY BRONCHUS

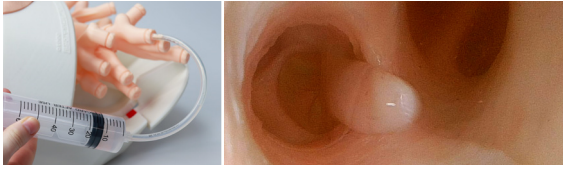

Choose where the bleeding starts. Fit the tubing cap to the selected bronchial opening and add simulated blood during the scenario.

*QUICK TO CLEAN

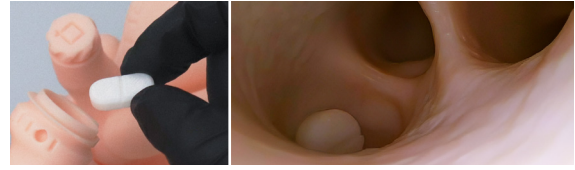

Separate the bronchial tree into sections, rinse the parts with water and reassemble them for the next session.

OBSTRUCTIONS

MUCUS PLUGS

Add mucus plugs to the bronchial tree.

FOREIGN BODIES

Add foreign bodies to the bronchial tree.

SUPPORTS THE FOLLOWING LEARNING OBJECTIVES:

NAVIGATION

Navigate the bronchial tree using a bronchoscope.

ANATOMY

Identify key bronchial anatomy and maintain orientation.

OBSTRUCTIONS

Locate and manage simulated bleeding and mucus plugs.

FOREIGN BODIES

Find and retrieve foreign bodies.

KIT INCLUDES:

- * Five-section bronchial tree
- * Simulated foreign bodies, including pills, teeth and fish bones
- * Spare parts
- * Tubing connection cap
- * Syringe and tubing
- * Simulated mucus powder
- * Simulated blood powder
- * Measuring scoop
- * Instructions for use
